

Products PT ALI Project

Portuguese partner worked in the main area of training teachers and trainers in the use of moodle platforms in different educational fields: RVCC processes; school curricular development and school communication with social partners, and we follow up the results of that training. Now we present the main outputs of the work done:

1- THE ROLE OF THE MOODLE PLATFORM IN SCHOOL LIFE

Beatriz Pires - Escola Secundária D. Dinis - Lisboa

and

Edite Esteves - Escola Secundária Eça de Queirós - Lisboa

Resumo

Partindo das dinâmicas criadas na formação TIC - CRIE, ao longo do projecto ALI, trabalhou-se na implementação e gestão das plataformas Moodle nas Escolas. Nesta apresentação iremos focar o desenvolvimento do trabalho executado nas escolas Secundárias D. Dinis e Eça de Queirós de Lisboa.

Abstract

From the dynamic created in ICT training – CRIE, along the ALI project, we worked on the implementation and management of Moodle platforms in Schools. This presentation will focus on the development of the work done in too Secondary Schools D. Dinis and Eça de Queirós in Lisbon.

2. PARENTS AND KIDS LEARNING WITH MOODLE

Conceição Bettencourt - Formadora

and

Alexandra de Souza - Escola EB1, nº 159, Agrupamento Fernando Pessoa - Lisboa

ABSTRACT

The work presented "PARENTS AND KIDS LEARNING WITH MOODLE" is a reflection of what was experienced in the training workshop "ICT and PNL" developed from October to December, 2008 in CFAS.

During the training interesting proposals came up. However for the project ALI we follow the work of Professor Alexandra de Souza who has developed a work with Moodle in classroom, with the participation of parents.

She has also encouraged other teachers, parents and pupils of the school to engage in this experience, sharing with them the dynamism of the platform.
